Craftsmanship:

We manufacture a competitively priced window while maintaining a handcrafted production process.

Wood Finishes:

Exteriors can be natural, primed or completely finished with Cabot's Factory Finish System.

Design:

We manufacture double-hung, casement, awning, and door windows in custom shapes and sizes.

Species Used:

Predominantly Ponderosa Pine with options for South American Mahogany, Red Cedar or virtually any other species.

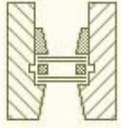

Turn-around:

From 3–6 weeks depending on specification.

We manufacture standard sizes for all window types (like Marvin or Andersen) or we can customize to a particular size or specification.

At our plant in Rutland, Vermont we tailor our product to our customers' needs by controlling the entire manufacturing process. We manufacture our own high performance insulating glass. We apply paint and primer using the Cabot Factory Finish System in our paint department. And we hand assemble and sand each window in our production department. Additionally, we use SFI-certified pine and FSC-certified mahogany to assure the longevity of our natural resources.
